SONARAY™ LED Lighting Named Top 100 Brand for Marine Industry in Marine News Magazine for Second Consecutive Year

(Verona, Virginia – August 14, 2018) SONARAY™ LED lighting today announced it has been named a top 100 brand for the marine industry by Marine News Magazine for the second consecutive year.

Marine News, which touts itself as “The Information Authority for the Workboat, Offshore, Inland, and Coastal Marine Markets,” publishes its annual list of top 100 companies in the marine industry each August. SONARAY™ was the only lighting brand among the top 100 and was recognized largely for its strength in blue and brown water applications using its line of tough, durable LED flood lights.

SONARAY™ flood lights are marketed to the marine industry under the OCEANRAY name and can be found all over the world in ports, shipyards, on commercial and military craft, and in many other maritime settings. The flood lights average more than 140 lumens per watt, are chlorine and salt-resistant treated, and are certified to UL 1598 (suitable for wet locations). The fixtures carry exceptional impact and ingress ratings, so they are top performers in some of the toughest environments around the globe.

According to Ken Bryant, SONARAY™ Director of Marketing; “We are extremely pleased and honored to again be recognized by Marine News as a top brand serving the maritime community. We believe the marine industry is one of the toughest environments in the world. You can find our flood lights anywhere from the Bering Sea to the Ports in Panama in a variety of installations. To be the only lighting company recognized by Marine News is fulfilling because it is indicative of the safety, toughness, longevity, and performance we build into this product line. Marine News is a source that is trusted by thousands of professionals in the industry and to be chosen again by such a fine publication is an honor and endorsement that we don’t take lightly.”

SONARAY™ LED Flood Lights are available through a network of agents across the U.S., Canada, and Latin America. The Americas headquarters are located approximately 2 ½ hours from Washington, D.C. and the brand is marketed in more than 100 countries globally.
