

## **SONARAY Announces All-In-One Pro Solar Fixtures**

**(Verona, Virginia – January 19, 2023)** SONARAY, a leading technology brand and manufacturer of proprietary LED lighting products today announced several new fixtures in its solar series offering. The All-In-One Pro Series is available in 30 and 60-watt models with the 60-watt fixture capable of producing nearly 13,000 lumens of light output.

The new series is IP66 rated, includes an “all-in-one” design that eliminates the need for additional hardware, provides a wide lighting distribution, and offer intelligent solar charge control for management of multiple solar units from a single controller.

According to Justin McCloskey, SONARAY LED Product Manager, “The new All-In-One Pro Series offers our customers many desirable features including exceptional lumen output, a 15-hour output duration with an 8-hour charge duration, a durable, ergonomic design and 5-year warranty. One of the most appealing features of the series is the singular design aspect that eliminates the need for extra mounting brackets or cumbersome solar panels. Panels are built-in to the fixture and allow users to collect and store natural power to maximize energy savings and decrease carbon footprint. In addition, adjustable tenon mount brackets make installation easy.”

The All-In-One Pro Series is constructed of aluminum housing with gray finish and provides luminous efficacy of 215 lumens per watt.

According to Robert Seward, SONARAY National Sales Manager, “The addition of this exciting new series to our solar product offering elevates our position as leaders in the solar lighting realm. Customers will particularly find useful the 433 remote controller that lets them manage multiple units up to 75 feet away even with potential obstacles in between. Users can also select from four lighting modes depending upon the season to adjust the unit for optimal charge and output. The All-In-One solution combines the best in performance, simplicity, flexibility, and more, making it indicative of the unique innovative solutions we are bringing to market and have coming in our product pipeline.”

SONARAY is a recognized leader in LED lighting and provides fixtures in a number of lighting categories. The brand is represented by preeminent lighting agencies throughout the Americas territories and has been recognized on four separate occasions by Marine News Magazine as a top 100 brand in the marine industry for its work with advanced flood light solutions.

Headquartered in Central Virginia, SONARAY provides lighting for industrial, commercial, marine, solar, and horticulture applications. More information on SONARAY can be found by visiting [www.sonarayled.com](http://www.sonarayled.com).
