### ATTENTION

This manual instructs the important information of installation and operation. Be sure to strictly follow the instructions before use. To ensure correct installation and operation of the product, carefully read and understand all contents of this guide. Any mechanical or electrical modifications to the product will void warranty and may cause dangerous hazards. To avoid potential issues caused by high temperature, be sure no objects are on the lens while the product is switched on.

### **GENERAL MAINTENANCE**

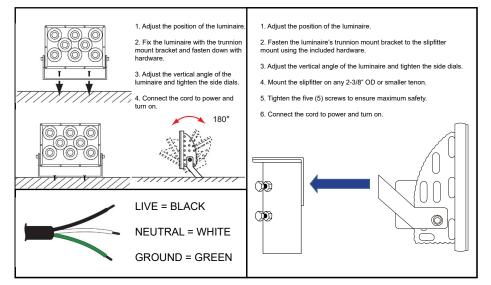

Make sure there is no power running to the luminaire when performing maintenance. The lens and the housing can be cleaned using a soft cloth without any corrosive material.

## INSTALLATION PREPERATION

- 1. Take out the luminaire from the box and place it on a level platform for easy installation.
- 2. For proper operation, a qualified electrician should perform the installation.
- 3. Ensure the normal ambient temperature of the installation location is between -25°C ~ +45°C.
- 4. Ensure the voltage of the luminaire is capatable with the onsite voltage before installation.
- 5. Any luminaire with damaged power cord should not be installed.

Note: The power must be cut off before installation.
